## What are the available upgrade options:

SPC42 → SPC52 SPC53 -> SPC63 SPCPCB-G2 → SPC42 SPCPCB-G2 → SPC52 SPCPCB-G3 → SPC53 SPCPCB-G3 → SPC63

### Process at a glance:

Acre's SaaS solution SPC Connect allows to request and manage license upgrades on demand for the SPCevo controller series. Once a preferred distribution has been selected on the company account settings, authorized persons can perform license upgrades. The system will send out respective confirmation email to involved parties.

License requested triggered by	EMAIL to	EMAIL to COMPANY MANAGER	EMAIL to Distribution partner
Approved engineer (installer)	yes	yes	yes
Company manager	no	yes	yes

## Prerequisites:

- Distribution partner must be selected in the company settings
- Either the company manager or an installer with appropriate rights can perform the licensing
- License upgrade operation available for online and offline controllers
  - Online: controller is connected to SPC Connect via FlexC ATS
  - Offline: controller is not connected to SPC Connect (e.g. part of a high-sec network)

**SPCevo Controller Series**
