

# S360 Strobe

## Visual & audio deterrence for even smarter security

The S360 Strobe is a powerful combination of LED-based status indication and two-way audio communication, designed to **enhance on-site security awareness and response**. Fully integrated with the S360 box, it provides real-time visibility and control for end users and installers alike adding a critical layer of deterrence and intrusion management.

### ✓ *Instant visual feedback*

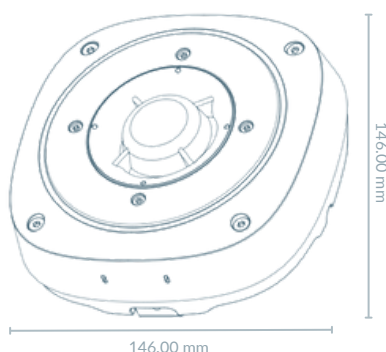

Multi-color LED indicators show system status at a glance (armed, disarmed, alarm triggered, ...) improving situational awareness for users and responders.

### ✓ *Built-in speaker for talk-down*

Enables remote audio intervention directly on site, allowing operators or users to speak to intruders.

### ✓ *Seamless integration with S360 box*

Plug-and-play compatibility ensures fast installation and synchronized operation with the core S360 security system.

Up to 120dB speaker with MEMS mic for talk-down

Front and back RGB lights (7 colors)

Various I/O ports for alarm and audio integration

Outdoor IP67 rated

DC 12-36V, DC 12V/4A connector
