

# Digital and Analog Audio Cables

**SCP RB-2 cable is a Siamese 75 Ohm  
Dual Shield Mini RG59/U Coax**

## Applications

- When terminated with RCA connectors, the RB-2 is ideal for unbalanced stereo audio
- Create audio and/or control interconnects
- Routing S-Video signals; also known as Y/C, in professional AV systems

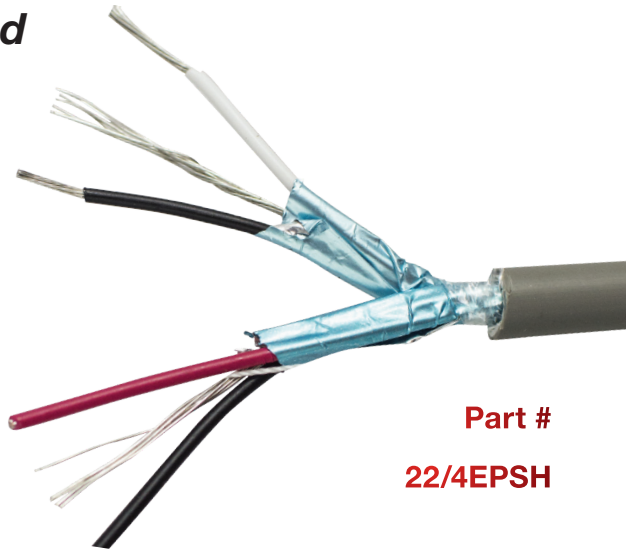

**Part # RB-2**

**SCP Line Level Analog Audio cables  
are "Balanced" Serial Control and  
Audio cables.**

## Applications

- High performance, transmission, and distribution of audio and control signals
- Designed to carry "left" and "right" analog line-level audio signals
- Maintains high signal levels over distance
- Permanent or Semi-Permanent installations

**Part #**

**22/4EPSH**

**Twisted Pair, 2 or 4 conductors with HD LSZH jackets**  
(Comparable to the Extron STP-22 series)
