AV Cabinet Premium, Grey..... 962101

AV Cabinet Premium back. Also available in grey.

Euroscreen® is proud to present the new AV Cabinet Premium within our range. As with all Euroscreen® products the new cabinet offers high quality with functionality, and the advantage of being styled and manufactured in Sweden.

The AV Cabinet Premium is a robust, yet smart looking piece of furniture that blends in well into most modern environments. Designed for ease of use, this cabinet is able to store all your AV equipment in one place. The Premium has no less than three shelves for equipment; the two bottom ones have adjustable heights for your specific needs, and the top shelf can slide out, up to 26 cm, for easy access. The cabinet is equipped with two solid lockable doors, front and back, to protect you equipment from theft.

The Premium cabinet has two cable holes; one on the top and one on the back door, this minimises cable-clutter and helps to keep a stylish and clean appearance. The back door allows convenient access for equipment installation, as well as allowing cleaning and maintenance. There are two sturdy cable-tidies to wrap cables around, large ventilation holes help to keep the equipment inside cool. The AV Cabinet Premium is available in beech or grey colour. As an optional choice we also offer 19" rackings for an easy and safe storage of AV equipment.
