ELPCS01 Mobile A/V Cabinet

The ELPCS01 mobile projector cabinet is an elegant solution offering the convenience and flexibility of a mobile high-quality display of up to 160", which is easy to move and set up wherever it is needed. All you need is a blank wall to project on to. Using the Epson Setting Assistant app makes it easy to ensure the display dimensions are correct and the image is clear.

By making your display mobile, it's easy to make your spaces as flexible as possible by offering a high quality display of up to 160" that can be moved to anywhere in the room it's needed - so you can support any room layout and ensure easy collaboration, whatever the activity.

Designed and built by Epson specifically for the EB-810E and EB-815E super-UST projectors (separately purchased), simply locate the ELPCS01 to its new location and use the free Epson Setting Assistant app to adjust the image dimensions in seconds.

The ELPCS01 offers both internal and external HDMI and USB ports, ensuring source devices can also be easily connected by cable. In addition, the EB-810E and EB-815E projectors both support wireless connectivity via Miracast - or for source devices that are incompatible with Miracast, the free Epson iProjection app is available.

The ELPCS01 mobile projector cabinet can be physically secured, too. Offering a lockable space and internal racking. Equipment such as a microphone or mini-PC can be securely stored for convenient access, and it even allows for a safety wire to be used as protection against the unauthorised removal of the cabinet and its contents.
