

acre One Mobile Credential & Engagement App

Manage Digital Identities & Engage Your Employees!

acre One is the premier mobile credentialing and employee engagement app, providing seamless digital credential management, two-factor authentication at the door, and a host of other cardholder engagement functionality. Empower your employees with an integrated work experience.

Manage Mobile Credentials

Manage your digital credentials, including BLE and acre Wallet, directly within acre One, from assignment through revocation. Reduce card issuance administration while elevating your on-boarding security process.

Two Factor Door Authentication

Level up your door security. With two-factor authentication, credential holders need to authenticate their identity using the acre One app after presenting their credential at the door.

Momentarily Open Doors

acre One allows employees to open doors directly from the app that have been assigned to their domain. Great for training labs and other common areas in shared workspaces.
