

SMS TIPSTER CAMERA SHELF

The great companion for videoconferencing on the go.

The SMS Tipster Camera Shelf is discreet and blends in perfectly with your display and the Tipster floorstand. Together with the SMS Tipster 2 Floorstand this is a great companion for huddle rooms, or for video conferences on the go. The SMS Tipster Camera Shelf is height adjustable and suitable for displays of approximate size 43 – 75". Thanks to the clever design, adjustment of the height can be done after the display is installed. Depending on the size of the display, it can also be possible to mount the camera below the display. The angle and position of the camera are adjustable, and a camera screw attachment is also included.

Measure 105 x 75 mm.
