# axessline

## Axessline Outlet Tray
PDU mounting tray, L370 x W200 mm

**1** POSITION AND FASTEN OUTLET
Using two M6 screws and two nuts (not provided), fasten one of our recommended electrical outlets to the cable tray. Use one screw and nut per side. Decide for a surface and align the outlet holes with the tracks from the cable tray. Consider connecting cables before mounting the cable tray to the table.

**Horizontal surface**          **Tilted surface**

**2** POSITION AND ATTACH
Position the cable tray and attach to the table using wood screws (not provided).

**3** READY TO USE
Once all screws are in position, the cable tray will be able to withstand pressure needed for connecting cables.

**Tip!** Be sure to make use of the two cut out cable exits.
